RACISM: Show the racism the red card

Racism is one of the crucial thing that we have been facing from decades. Just like covid-19 it is also a pandemic where people are so obsessed with a particular color that they can go to any extent to change themselves into fairer .

Our society consider black as a ugly ,and suggest people to experiment all the beauty products which can even harm the skin. We as a individual has to accept that no matter whether you are dark or light , we all are same.

Start the change Say no to Racism

Black Lives Matter Every color is beautiful

Subsequently it has changed women's life and there is now equal number of facilities provided to the women too in every field. But sadly there is a proportion of population who believes that women are meant to do all household things and are not given freedom as they supposed to get.
